

Environmental Policy

AAF International is committed to applying environmentally friendly practices in all aspects of our business operations.

We believe that the economic growth of our company and the conservation of our natural environment are complementary.

We shall continue to make improvements to our environmental management system guided by the philosophy of taking action with the future of the Earth in mind.

We will promote a corporate culture where compliance with applicable environmental requirements is the minimum level of acceptable performance.

We will do this through:

- Compliance with applicable environmental legislation and regulations
- Identifying further opportunities to prevent pollution, reduce waste and conserve our natural resources
- A commitment to continuous improvement by measuring and monitoring our progress towards minimizing our environmental impact
- Regular evaluation of environmental performance by senior management
- Training and education programs for all AAF employees to inform them about their environmental responsibilities

A handwritten signature in black ink, appearing to read 'Peter Kurto', written over a thin horizontal line.

Peter Kurto
COO, AAF International
